THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The gasoline dump of Mád (K 28) is guarded by Soviet troops with blue epaulets.

50X1-HUM

2. The dump is not connected directly with the railroad station; the spur line has been constructed from south of the Mád station to the central pumping station.
3. Each of the fuel tanks is connected with the pumping station by means of small pipe lines. Each tank can be closed automatically. Thus it is possible to fill or empty the tanks, maintaining an equal level in each of them, by means of the double pipe lines and by using compressors with 3.6 atmospheres.
